Domain Registration and Management Policy

Version 1.4 | Effective date: November 28, 2026

Provider: Niels Bunschoten, doing business as Webworthi | Costa Mesa, California, USA | nb@webworthi.com

Your domain belongs to you regardless of subscription status, cancellation, nonpayment or eligibility for a website source transfer.

1. Registration options

Use an existing domain, buy and manage a new domain yourself, or authorize Webworthi to assist. Tell us the preferred name, exact spelling and extension. We confirm availability and actual cost with you before registration. Availability can change before purchase completes.

2. Costs and approvals

Registration and renewal are separate from subscription fees. Standard domains typically cost approximately $10–$30 per year. Actual pricing varies by registrar, extension, availability, promotions and renewal rates. You pay only the actual approved registrar cost without a Webworthi markup. Business email hosting and paid vendor services are separate unless expressly included.

3. Account control

Use the customer’s name and customer-controlled registration account wherever possible. Give only the delegated access required to manage approved changes. Agree who pays renewals, who receives notices and which auto-renewal setting applies. Customer keeps contact and billing information current. Registrar transfer locks and verification requirements can affect timing.

4. Handover

On authorized request, return management control and assist with DNS or registrar transfer. Coordinate records to avoid disrupting email and other services. Never use a customer-owned domain as leverage for a website subscription debt. Hosting suspension does not authorize domain cancellation or deletion.
